

I'm writing you in concern over the recent petition (04-160) brought up by the national association of Broadcasters. I would like to urge you to vote this bill down because this bill goes against America's principles of free competition. The National association of broadcasters would like you to think that local content on satellite radio will destroy their business. I feel that these services will do the opposite and actually cause competition and improvement in services by both local channels and Satellite radio. The introduction of satellite radio in my opinion has really raised the bar for how local traffic and weather is presented. I feel that it is important that congress helps the progression of technology. The introduction of this bill would put unfair limits on satellite radio companies and give an unfair advantage to other broadcasters. In conclusion I feel it is important that you promote competition in the American market place by voting down petition 04-160. Thanks for your time
